Introduction

- 'Gamescored: Connect, Share and Level Up' is an innovative platform designed to connect gamers in a highly interactive and dynamic environment. Gamescored offers a space where users can not only follow the latest advancements in gaming but also share their experiences and content with fellow gamers.
- The platform stands out as a community-driven hub where users can engage in meaningful discussions through dedicated rooms, stay updated on new game releases, and immerse themselves in both offline and online gaming tournaments.
- Unlike many current gaming community platforms, which often focus on either content sharing or communication, Gamescored aims to provide an integrated experience. Gamers no longer need to switch between apps or websites to engage in discussions, share gameplay, and get the latest news. This cohesive approach ensures users can easily transition between connecting with friends, discovering new games, and participating in gaming events, all within a unified platform.
- The advantage of Gamescored lies in its user-centered design, prioritizing ease of use, real-time interactions, and a comprehensive set of tools that address the varied needs of the gaming community. Its streamlined interface and features distinguish it from other fragmented platforms, offering gamers a one-stop solution to stay connected, informed, and engaged with the broader gaming world.

Aim

The platform aims to bridge the gap between passive information consumption and active community engagement, offering features that encourage discussion, content creation, and participation in events. With a focus on accessibility and user engagement, Gamescored provides a centralized, all-in-one platform, setting itself apart from current gaming community platforms that often require users to use multiple services to achieve the same functionality.

Gamescored offers a streamlined user experience with easy navigation, content sharing, and discussion rooms. Gamers can connect with peers, share content, and participate in both offline and online tournaments all in one place.

Future Scope:

The future scope of *Gamescored* presents numerous opportunities for growth and expansion:

1. **Mobile App Development**: To enhance accessibility, developing a mobile application for both Android and iOS platforms will provide users with an improved experience, allowing them to stay connected on the go.
2. **Advanced Personalization**: Implementing machine learning algorithms to recommend games, content, and discussion topics based on user preferences and behavior can improve user engagement and retention.
3. **Monetization Features**: Allowing users to monetize their content, such as through paid subscriptions or advertising for creators, could encourage more content generation and increase platform activity
4. **Incorporation of eSports**: Introducing an eSports section that includes live streaming, tournament registration, and real-time updates for major events will attract competitive gamers and expand the platform's user base.
5. **Global Expansion**: Expanding the platform to support multiple languages and cater to a broader global audience can increase its reach and attract diverse gaming communities worldwide.

6. **Jobs** – We also plan to help gamers convert their passion for gaming into a career, enabling them to find opportunities through networking or otherwise on our page. Fulfilling our goals of making the page for gamers by gamers

HARDWARE INTERFACE

Server Hardware:

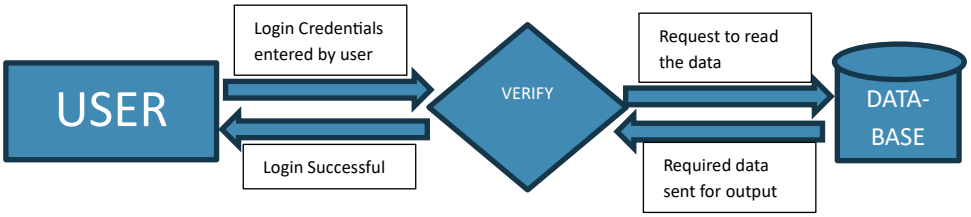
- **Processor**: Intel Xeon E5-2670 or equivalent.
- **RAM**: Minimum 16 GB (32 GB recommended for high traffic).
- **Storage**: 500 GB SSD (scalable based on user data growth).

Client Hardware:

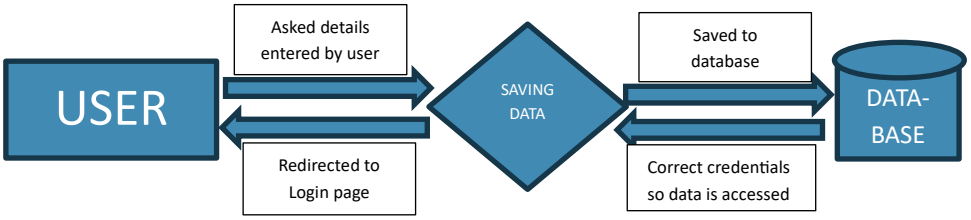
- **Device**: Any device capable of running modern browsers (PC, laptop, tablet, mobile).
- **Processor**: Minimum Intel i3 or equivalent.
- **RAM**: 4 GB or higher.
- **Storage**: 200 MB for cache and data storage.

Data flow diagram:

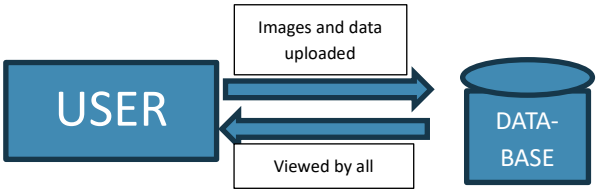
1. Login credentials:



2. Sign Up Verification



3. Content Uploading:



Database Design:

login_credentials			
Field_name	Datatype	Description	Constraints
userid	varchar	stores the unique identification userid of user	primary key
pswrd	varchar	stores password for login	not null

signup_details			
Field_name	Datatype	Description	Constraints
userid	varchar	stores the unique identification userid of user	primary key
email	varchar	stores email address associated with account	
pswrd	varchar	stores password for login	not null
cnfrm_pswrd	varchar	stores same data as pswrd	not null

upload_content			
Field_name	Datatype	Description	Constraints
img_path	varchar	stores path of the image	primary key
caption	varchar	stores caption/information associated with image

At the heart of Gamescored are its visionary founders: Yuvraj, Agamya, and Shaina. Together, they have crafted a vibrant community where gamers of all backgrounds can unite.

Yuvraj, a dedicated gamer and tech enthusiast, envisioned a space where players could not only connect but thrive by sharing their passion for gaming. His technical expertise and love for creating seamless digital experiences have made Gamescored a hub for gamers to engage and explore.

Agamya, with her deep understanding of community building and leadership, brought her passion for inclusivity to Gamescored. She ensured that the platform was accessible to everyone, from casual players to competitive pros, fostering an environment where every voice is valued. Agamya’s organizational skills and love for strategic play have shaped Gamescored’s exciting events, which bring the community closer together.

Shaina, the creative force behind the platform, combined her love for storytelling with game design, helping shape Gamescored’s unique brand

identity. Her creativity has inspired gamers to not just play but share their stories, turning Gamescored into a space where epic gaming moments live on. Together, Yuvraj, Agamya, and Shaina have built a gaming community that’s more than a website—it’s a movement.</p>
